

The 7 Best Things About Custom Hardscaping for Homeowners in Des Moines, IA

People really want to improve their homes by adding outdoor living spaces, and for good reason. Hardscaping elements like patios, retaining walls, fire pits, and walkways not only look good, but they also make the space more useful. In [Des Moines, IA](#), hiring a professional to do hardscaping is a smart investment that will make your home more valuable, comfortable, and unique over time.

Lark Landscape is a Des Moines, IA company that specializes in custom hardscaping and landscaping. We make outdoor spaces that are beautiful, useful, and long-lasting.

1. Increase the Value of Your Property

Hardscaping adds usable outdoor living spaces to a home, which greatly increases its value. For instance, a beautiful paver patio can give you back up to 80% of what you spent on it. Hardscaping is a great long-term investment because buyers like homes with well-planned outdoor features.

2. Easy to care for and long-lasting

Hardscapes don't need as much care as regular lawns do. They don't need to be mowed, watered, or fertilized. Stone, concrete, and brick are some of the materials that can handle Iowa's harsh winters and hot summers without losing their appeal. Lark Landscape can install your hardscapes professionally so that they will stay beautiful and strong for decades.

3. Stop erosion and make the drainage better

Proper drainage is very important in places like Des Moines that get a lot of rain. Grading solutions, retaining walls, and permeable pavers all help keep water away from your home, which protects your landscaping and foundation. Hardscaping keeps your yard looking good while also stopping soil erosion.

4. Make your living space bigger

Look outside your home. You can make your outdoor living space bigger with custom patios, seating areas, or outdoor kitchens. Have dinner parties outside under the stars, summer barbecues, or cozy nights around a fire pit. Lark Landscape makes outdoor areas that feel like natural extensions of your home.

5. Make the outside look better

A well-planned hardscape makes your property look more elegant and balanced. Decorative stones along the edges of paths, lighting on retaining walls, or textured pavers around the edges of gardens are all easy ways to make your home look better from the street.

6. Good for the environment and long-lasting

When done right, hardscaping can help the environment. Lark Landscape uses materials that let rainwater naturally filter into the ground. This cuts down on runoff and helps recharge groundwater. When you add these features to native plants, they make the landscape more eco-friendly.

7. Made for every season

Hardscaping gives you a place to enjoy all year long. Your outdoor space is always welcoming, whether it's spring, summer, fall, or winter. Our materials and building methods are made to last through Iowa's freeze-thaw cycles, so they will work well for a long time.

For your hardscape project, pick Lark Landscape.

When you hire Lark Landscape, you're working with a group that cares about quality work and paying attention to the little things. We make and install custom hardscapes that fit your way of life, look good with your home, and last a long time.
